MOS Word 2019/365 has been released!

We are proud to announce that the G*Metric MOS Word Associate 2019/365 practice exams have been released! The new tests have already been added to all existing G*Metric MOS licenses, and can be added to any new or existing access codes created with those licenses. You can also look forward to content for Excel 2019 and PowerPoint 2019 coming in the near future.

Search By Access Code

This page will display Access Code and Student information pertaining to the Access Codes that match your search. You can enter either the entire access code, or just the identifier. Codes can be enabled and disabled with the buttons below. The first table pertains to the whole access code. Any code disabled here will still be usable by any students that have already redeemed the code. The second table pertains to an individual student's access to a code. If a code is disabled here, the code will remain active for any students except the ones checked. If a student has no uses remaining in the "Available" column, the ability to reactivate the code is disabled.

Part 2 architectural assistant

📍 London
📅 Permanent

★ Save ➦ Share

Carey Jones Chapman Tolcher is seeking an experienced Part 2 architectural assistant to join its practice in London. The individual will be one of a number of young and talented architects in our London studio and will be a key part of the architecture team. He or she will work with a team of architectural assistants, technicians and more experienced architects and associates, under the line management of a director on a daily basis, with responsibility for design elements and aspects of delivery of their team's projects across various sectors including residential, commercial, education and mixed-use.

At Carey Jones Chapman Tolcher we focus on design-led, original and efficient schemes from project inception to delivery. Working alongside our interior architecture team we foster an open, direct and collaborative work culture that inspires great work for us and our clients.

Responsibilities and skills

London, UK

Senior project architect at Makower Architects

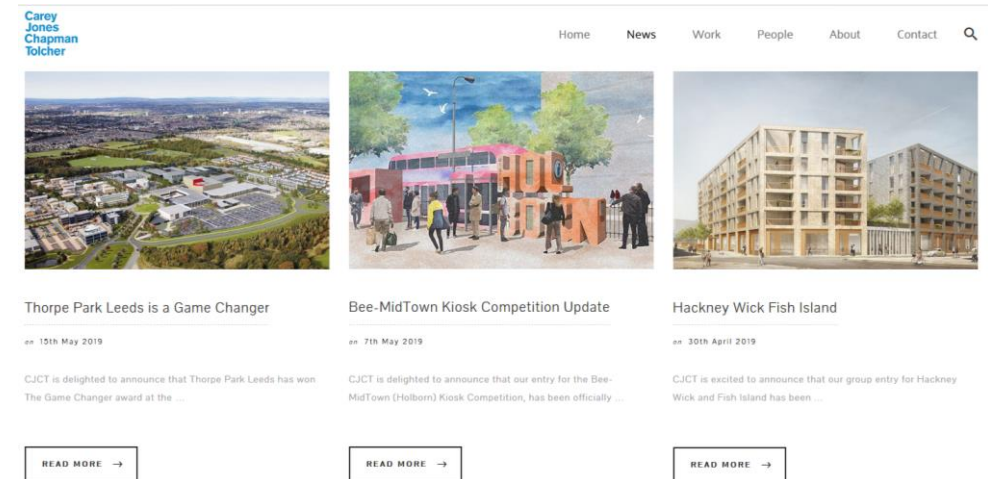

Makower Architects is seeking an experienced senior project architect to join its team in London to run a large-scale residential project.

Candidates must have 6-10 years of experience and have delivered multiple large scale projects from detail design to completion. This is an opportunity to join a vibrant young practice at a senior level and help shape its fast growth. Makower Architects is a design-led studio working across all sectors from residential, commercial mixed use developments to significant international urban masterplans and city-making strategies.

The right candidate will have:

- experience delivering large residential projects from planning to completion (with emphasis on coordination, tender and construction stages)
- residential detail design and construction experience a must
- thorough knowledge of building systems
- strong technical detailing a must
- experience chairing design team meetings and coordinating consultants
- first point of contact with clients
- experience leading a team of architects
- experience controlling overall design programme and budget
- experience with site inspections
- thorough knowledge of UK building regulations and planning
- thorough knowledge of building specifications, NBS a plus
- knowledge of different construction procurement routes
- knowledge of Autodesk Revit a plus, preferably on large scale projects
- knowledge of Adobe Creative Suites a plus
- fluent spoken and written English
- demonstrable experience across all RIBA work stages

Design Philosophy

From Nature

[...] when you build a thing you cannot merely build that thing in isolation, but must also repair the world around it and within it, so that the larger world at that one place becomes more coherent, and more whole, and the thing which you make takes its place in the web of nature as you make it.

Christopher Alexander
A Pattern Language, 1971

LinkedIn profile

Makower Architects

About Us

Makower Architects is an international practice specialising in Architecture and Urbanism. Current projects include a landmark group of residential buildings in West London with a twenty story tower, three major developments in Cambridge with a mix of civic and residential buildings, a large mixed-use office development and 80 hectare heritage-led masterplan in Doha, Qatar, and several Heritage projects. Our approach to design, at all scales, is one of 'contemporary contextualism' and in the firm's work there is a fascination in both place and history being the source and 'seed' of design. Design should grow out of its context - in time and place - in order to fit in.

All projects begin with Research. History of architecture and urbanism are essential parts of 'Living Heritage' where the past and the future are inextricably bound into the present and together work as generators; for projects to grow out of, and thereby fit into, their Context. Current projects can be viewed [here](#).

The workload includes over 1,000 residential units (at all design stages from concept through to detail), over half a million square feet of office and retail space, and masterplans totalling over 100 hectares. The team is spread between offices in London and Doha and is now 30 people strong.
